

Regarding the DBC-Pro Video Sample Clips

Video Samples are Exported from the EPlayer Video Player application dedicated for the system.

Exported samples will not have the GPS Mapping, Vehicle Speeds, Speeds Charting, Location or Compass Heading, so all you are seeing is the actual video file in a very streamlined form.

Full High Definition 1920x1080 recorders like the DBC-Pro provides High Definition images creating very large video files. The size of most sample videos will far exceed what can be quickly downloaded or viewed, so we have added a couple very small files for faster viewing.
