

# Driver Body Camera Firmware Update Instructions

**For: DBC & DBC-Pro and all Reseller versions**

## **Re: Audio Mute Feature Firmware**

Administrator Permanent Audio Disable - There is "Microphone" option menu item, choose off or on; for complete Audio Mute Feature by Administrator for application forbidding Audio.

Officer Temporary Disable Audio - When camera is recording with Audio, a long press of the Video Camera recording button will trigger the device to vibrate and Disable Audio, when Disabled on the top right of the LCD screen there will be a Microphone with a red circle and slash though it indicating Audio is Disabled. When you wish Audio recording again one long press of the button will enable Audio recording again.

**Attached is the Firmware Update for Audio Mute Feature.**

Update Instructions:

Connect device to the PC,

Enter into Administration firewall with password to open the disk to the PC view.

Unzip "Audio Mute Firmware Update", place in root directory of device internal SD card & restart" folder.

Place the contents (2 files) into the Root directory of the device internal SD card.

Restart the device, it will ask to update Firmware move default selection on Right to the Left where it will activate the firmware update.
