

FHD4G Sample Video Clips

This folder contains FHD4G w/Stop Arm Camera Video clips

Camera #1 is Driver BTC-SDI camera with HD-SDI 3 Megapixel camera with 2.8mm wide angle lens typically for large vehicle use such as school bus, transit bus, or shuttle.

Camera #2 is Road View PD-SDI camera with HD-SDI 3 Megapixel camera with 2.8mm wide angle lens and removable sun shade to reduce sunlight induced glare, with IR LEDs disabled to prevent "ghosting" effect of reflected IR LED glare off windshield.

Camera #3 is SAC-SDI Stop Arm Camera with HD-SDI 3 Megapixel camera with 12mm lens. Stop Arm Camera is focused at 12 meters or approximately 40 feet to capture vehicles that would pass a stopped school bus loading or unloading children.

Camera #4 is Road View Mini-SDI camera with HD-SDI 3 Megapixel camera with 8mm lens.

Playback of Video Require DVR_Player:

located in the Video Player Folder found here:

<http://www.americanbusvideo.com/CUSTOMER-FTP/FHD4/>

Video Player must be operated under Administrator login.

Minimum System Requirements for: FHD4G, FHD4W & FHD4C DVR_Player

1. CPU: Intel Core i5 3.4 GHz
2. RAM: 6GB (8GB or 16GB would be better)
3. Video standard: Intel(R) HD Graphics

Note on Video Clip Length:

The Sample Video clips online are very short from 15 seconds to a minute, as the High Definition quad camera stream videos are 4x-40 times larger than some lower resolution image files, so if we do not keep them very short it would take a very long time to download a full video file segment.
