4.Setting DVR

A.Turn on the MDVR and enter the menu, the password is 6666.

B.Below is the main menu.

C.Click the Network, it will show as below:

D.LAN mode

Click LAN and input the IP address according to your network, and input the server IP and port.

E.3g/4g mode

Input the ANP setting according to your 4G carrier.

Choose the net type to 3g/4g, DHCP to ON, and input the server IP and port.

F.WIFI mode

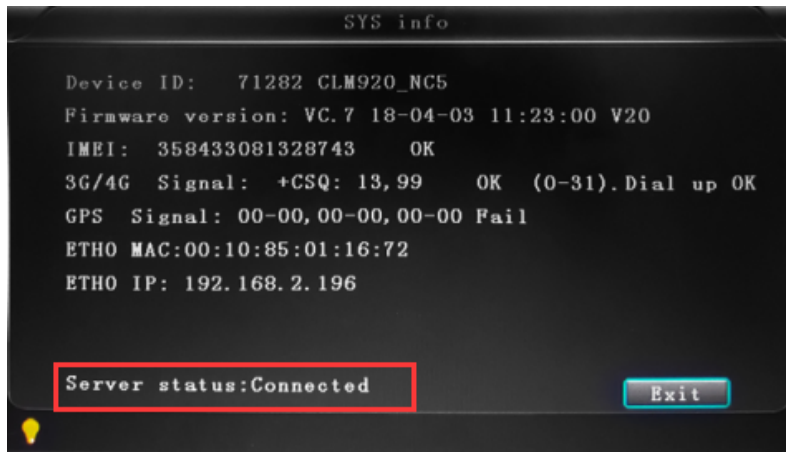

Input the WiFi setting according to wireless network.

Choose the net type to WiFi, DHCP to ON, and input the server IP and port.

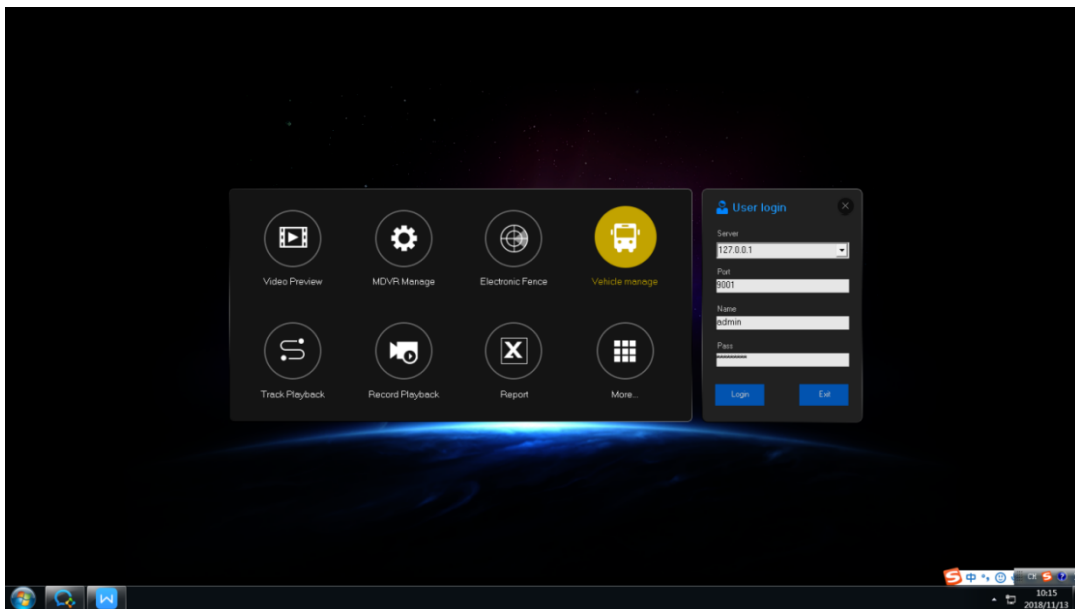

After input new setting, please restart the MDVR to check the status of server connection.

5.Login the server by T8 CMS

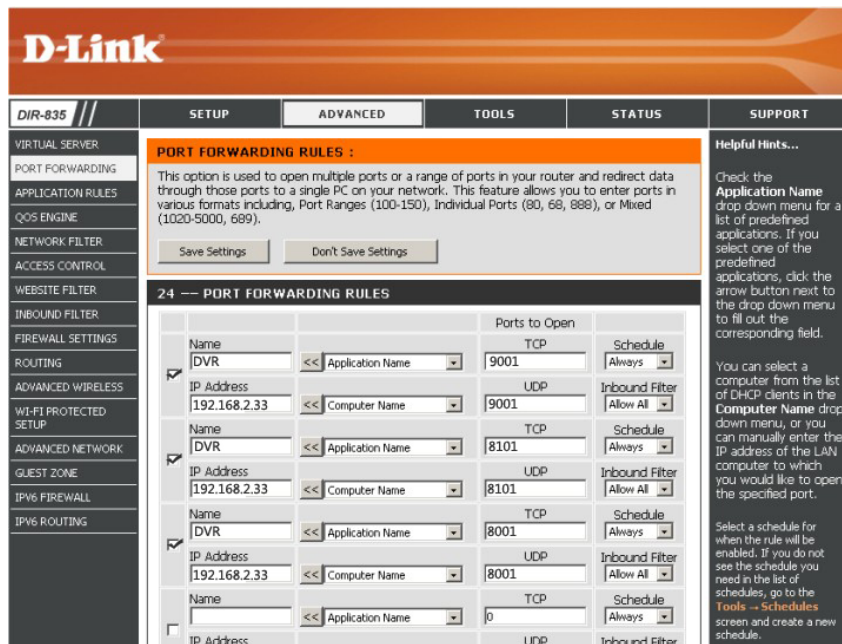

Run the T8 cms and input the sever IP, port, user name and password.
(127.0.0.1/9001/adminname/adminpass)

6.Port mapping

A.mapping the port

Here we suggest to do port mapping for 8101-8105, 9001-9010, then the outer network can log in CMS. For example, if your server is in office and you did not do port mapping, when you work at home, you can't log in CMS. Different routers, setting methods are different, please refer to the following Settings:

- Name: fill in a name for MDVR port.
- Ports to Open: 8101-8105, 9001-9010
- IP Address: Server IP address
- Inbound Filter: TCP、UDP、Allow ALL, Please select "Allow All"
- Schedule: select "Always"

B.Domain binding setting

If you don't have a static public IP address, you need to do domain binding, please ask your network administrator for help.

DIR-835 //	SETUP	ADVANCED	TOOLS	STATUS	SUPPORT
ADMIN TIME SYSLOG EMAIL SETTINGS SYSTEM FIRMWARE DYNAMIC DNS SYSTEM CHECK SCHEDULES	<h3>DYNAMIC DNS</h3> <p>The DDNS feature allows you to host a server (Web, FTP, Game Server, etc...) using a domain name that you have purchased (www.whateveryournameis.com) with your dynamically assigned IP address. Most broadband Internet Service Providers assign dynamic (changing) IP addresses. Using a DDNS service provider, your friends can enter your host name to connect to your game server no matter what your IP address is.</p> <p>Sign up for D-Link's Free DDNS service at www.DLinkDDNS.com.</p> <p><input type="button" value="Save Settings"/> <input type="button" value="Don't Save Settings"/> <input type="button" value="Reboot Now"/></p>			Helpful Hints... <p>To use this feature, you must first have a Dynamic DNS account from one of the providers in the drop down menu.</p> <p>More...</p>
