Read Me Notes:
The system has 2 cameras, GPS and G-Sensor.
Unzip archive, or copy folder to your windows desktop.
It is a folder with 2 AVI files.

Download the newest version of AVPlayer v2.3.5 at:
http:// www.americanbusvideo.com/CUSTOMER-FTP/
SD4mX/Video%20Player/ (This is n now the only
version that has the corrected Google map fix)

Open the newest version of AVPlayer v2.3.5
Browse for the folder named: "View with AVPlayer G-
Sensor & GPS"

Camera 1 is ExCam so it is an external camera with no
mic.
You must select Audio Channel 2 for audio to be heard
as the AVPlayer defaults to Audio Channel 1.

For G-sensor charting remember to place pointer under
graph and click when the "+" symbol appears to expand
the graph.
